	Entities	129					
IV. SERVICE QUALITY INDICATORS							
Of domestic line being used	Capacity	132	H1	Percent 1000 MNT			
	Payment	133					
Complaints per	Related to the internet speed	134					

Complaints per 1000 customer	Related to behaviour of service employee	135	H1	Percent		
	Related to the period required for new connection	136				
Time to repair damage or delay	Main network	137		hour		
	Customer line	138				

V. TRANSMITTER'S TECHNICAL SPECIFICATIONS

Transmitter name	139	H2			
Number of transmitter	140		pcs		
Type of transmitter	141				
Transmitter power /Bt	142				
Location of transmitter	143				
Longitude/N	144		degree		
Latitude/E	145				
Carrier power	146		W		
Radius of service/km	147		km		
Wavelength-l/m	148		m		
Bandwidth	149				
Data stream amount to use /Mbps	150		Mbps		
Available frequency band/MHz	151				
Power_erp/W	152		W		
Insertion loss/dB	153		dB		
Rx sensitivity/ μ V	154				
Emission Standard	156				
Regular hours of operation/hour	157	Hour			

TECHNICAL SPECIFICATIONS OF ANTENNA

Name	159	H2			
Type	160				
Azimuth_E/ $^{\circ}$	161		degree		
Elevation_V/ $^{\circ}$	162				
Beam width_E/ $^{\circ}$	163				
Beam width_H/ $^{\circ}$	164				
Gain/dB	165		dB		
Antenna height/m	166		m		
Polarization_V/H	167				
Cable	Size/diameter		168		
	Resistance	169	OM		

Confidentiality level of the information:

H1 - To be used for the Regulatory Commission only. /Not to be disclosed to public/

H2 - To be used for developing annual communication market report.

*We declare that the information, reference and materials we provided on this form is complete and true.
